

# Lewis & Clark Summer Expedition

Kansas

This week you head into Kansas where there are thousands of buffalo. Read a little about them here:

<http://eduscapes.com/nature/bison/kids.htm>, then choose your activity:

- A. Observe buffalo at a zoo or buffalo farm. Bring your L&C journal and record your observations. Try to imagine what it might have been like seeing thousands of them on the plains.
- B. The expedition had to eat what was available so they had to be adventurous eaters. Are you an adventurous eater? Make buffalo burgers or buffalo tacos with your mom or dad.

Write about your experience in your journal. How did the buffalo behave? Did your burger taste different than a regular hamburger?
