

Lewis & Clark Summer Expedition

North Dakota

As we travel through North Dakota, read a little about the plants the expedition saw for the first time on the Montana Kids website. Then choose:

- A. Collect plant specimens from your garden or yard. Make your own plant press or press them in a book.
- B. Take a trip to a botanical garden or arboretum near you. Bring your Lewis & Clark journal. Write down and sketch your favorites. How many are new to you?

Write about your experiences in your Lewis & Clark journal.
